DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The prior art of record alone or in combination does not disclose or suggest a packet authentication method where data packets are conveyed in such a way that a server can verify the sender of the data packets using a two stage process of generating a list of random numbers that a recipient is in possession of then including that random number within the data packet to be sent to the recipient. Particularly persuasive is Applicant's argument that while the prior art does disclose a random number, it does not disclose that the random number was chosen from a list of stored random numbers previously communicated to a recipient, or that the selected random number had not been previously selected and included in the data packet to be sent. Therefore, claims 1 – 21 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
